牧童故事 COWBOY STORY

上世纪五六十年代，那是一个农耕为主、自力更生、人民日出而作日落而息的年代。祖国东南部，瓯江下游南岸，鹿城的郭公山脚下，那就是他的家乡。他是家中的老大，按排行叫阿一，作为家中的“小大人”，他理所当然地做着家务，照顾着弟弟妹妹。一天，父亲领回生产队的两头牛，交给他看养，挣点工分贴补家用，于是他就成了“牧童”，俗称放牛娃。

南方人放牛不像北方大草原或西部山区的大批量放牧，把牛羊赶到草原或山里了事。他放的两头水牛是生产队的主力耕牛，每天中午11点从大人手中接过干完农活的牛，下午4点左右将牛牵到田头工地交给大人继续耕作。阿一每次接过耕牛，眼里总有浓浓的怜惜和敬佩。牵着它们一边沿着田埂吃草，一边继续寻找肥美嫩绿的草地，要想办法让牛在下午4点前吃得饱饱的，又要提防牛“偷吃”庄稼；水牛吃饱喝足没了羁绊，有时会嗷嗷大叫，撒欢追逐，互相袭斗，甚是精彩却也惊险，如果糟蹋了作物或误伤人畜那可了不得……这样放牛，每天也就5个小时，不算很辛苦却也不轻松，因为酷热的南方雨水多，经常出门时阳光灿烂，倏地风云突变，暴雨如注……

阿一放牛日晒雨淋，却也快乐无穷。山野田边，放牛的孩子年龄相仿，三五成群，互相嬉戏，有时海阔天空聊个没完，有时摸鱼捉虾嬉戏打闹；有的一块儿玩，有的一块儿闹；风雨声、笛哨声、嬉笑声、牛的哞哞叫声交织成一片……真是一场快乐的牧童聚会！

牧童们和牛相处久了，慢慢摸透了牛的脾性，和牛就有了感情，放牛更加得心应手。有时候走累了，就跨上牛背，或骑着或躺着，让它们边吃边走，边走边吃，漫无目的，越溜越远；等到了下午，牛吃饱喝足了，刷洗干净，才又骑上一头，牵着一头，直奔耕作的地头田间。

每每骑在牛背上，阿一总想起“牧童归去横牛背，短笛无腔信口吹”的诗句，想着古人骑牛的韵味。阿一看向远方，目光坚定，似乎思索着什么，追寻着什么。后来，阿一果然离开了家乡，去了远方……

转眼到了上世纪九十年代，珠江边上首次出现了一个儿童游乐玩具的企业，规模很小，只有三五个人。正是这星星之火，燃起了游乐玩具在南方的燎原之势。辗转几十年，追寻梦想的力量创造了传奇，创造了新时代一个又一个儿童王国。当今的孩子，没有了耕牛作伴、山野田间的嬉戏打闹，却有了五彩缤纷、充满趣味的现代游乐王国。

不同的是环境，不变的是安全、欢乐和自由，永恒的是孩子们心灵的内力觉醒……

牧童从来不只是做玩具，而是在传承快乐和成长！

DESIGN PRINCIPLES FOR CHILDREN'S PLAYGROUND

1. SAFETY FIRST

Since the child are liable to injuries when they're playing games, special attention must be paid to safety problem in designing the children's playground. Meanwhile, the location of a children's playground shall free from the disturbance caused by traffics, roads, disordered environment and noisy public activity space. At the same time, children's playground shall be in close contact with its surroundings to avoid any dead angle ad reduce the risk of car accident and criminal events. Besides, during the transformation process, special attention must be paid to the detailed design and the safety of entertaining equipment. Relevant management and maintenance work shall be enhanced to avoid any injury caused by a nail and a bolt.

2. CHILDREN ORIENTED

Planning and design of children's playground shall be carried out to satisfy the child's demand for games based on the child's physical conditions,psychological traits and the park's actual environmental conditions. Since the child's activities and psychological characteristics are different from the adult, the arrangement of children's activity space and playground facilities shall be geared to serve the child, fully respecting their individuality and independence. In the meantime, the child's creativity shall be developed and stimulated,and the relationship between challenge and safety,private space and public space and dynamic space and static space must be well developed to create a better children's activity space.In terms of relevant transformations,great importance shall be attached to the child's line of sight when they are walking,running and climbing as well as their body movement,and relevant service facilities shall be added based on the child's activity scale.

3. IN LINE WITH THE ACTUAL SITUATION

As the site for children's playground is not always flat and evenly smooth, we shall make full use the current land form, plants and infrastructures,and make proper improvement. If all conditions are met,we can even create a novel and interesting activity space for the child based on the existing land form and other structures. Except for some traditional facilities such as swing,seesaw and slide, we're able to put the old tires and rollers into service, which will reduce the cost,and encourage the child to exert their creativity and imagination.

4.COMBINATION OF MAN AND NATURE

Through fully exploring the relationship between man and nature, children can find a change to speak with the nature, and to experience the fresh air,the earth and various plants all by themselves. Right in the nature, the child can indeed perceive the world in reality,and seek for their own development both in life and nature.

儿童乐园设计原则

1.“安全第一”原则

儿童在游戏活动中是极易受到伤害的弱势群体，在儿童游乐场改造设计中必须把安全问题放在首位。儿童游戏活动场地的选址应避免车行道的干扰，远离环境杂乱、人员复杂及流动性大的公共活动场地，同时和周边场地要密切联系，避免视觉死角，减少车辆、犯罪等危险因素的存在。同时，在场地改造过程中注意场地细部设计及游戏器械的安全性，加强管理和维护，避免出现钉子和螺栓等对儿童造成意外伤害。

2.以“儿童为本”原则

儿童游乐场规划设计既要满足儿童游戏需求，也要根据儿童身体状况特征、心理特性和公园环境条件而定。儿童的活动尺度、身心特征与成人有所不同，因此其活动空间及游戏设施的布置应以服务儿童为宗旨，充分尊重儿童的个性，遵循儿童的自主性，开发儿童在活动中的创造性，同时处理好活动的挑战性与安全性、私密空间与公共空间、动态空间与静态空间之间的关系，创造良好的儿童活动场所。在改造设计中，要注意儿童在游戏活动中走动、奔跑、攀登及爬行时的目光视线和身体尺度·增加以儿童活动尺度为标准的服务设施。

3.因地制宜的原则

儿童游戏场地并不一定是一马平川、完完全全的平地。设计中应充分利用儿童游乐场地的现有地形、植物和基础设施，并对其加以完善。在条件下，可以利用地形以及其他构筑物创造出新奇的儿童游戏空间。除了秋千、跷跷板、滑滑梯等传统上的游乐设施，也可以在地形利用的基础上，采用旧轮胎、滚筒之类的器具作为儿童游戏的器械，既降低了游戏场地的造价，也可以充分发挥儿童的创造力和想象力。

4.人与自然结合的原则

充分发掘人与自然的的关系，让儿童在与父母他人交流的同时与自然对话，感受空气、土地、植物等，融于自然·让孩童在对外界的感知和领悟中自我体验，在生命与自然的感知中自我成长。

DIVISION OF CHILDREN'S AGES AND BEHAVIORAL PSYCHOLOGY ANALYSIS

For the division of children's ages, Convention on the Rights of the Child issued by the United Nations has clearly stated that children are 0-18 years old. However, in the field of medicine, children from 0 to 14 years old are their object for paediatric research. Based on such definition in the field of medicine, children can be divided into three major groups including Infant Group, School Children Group and The Juvenile Group. Children at different ages also vary in their growth, physical strength, intelligence, mentality and physiological features, in which way, different children have different requirements on their outdoor activity time, content and surrounding environment.

1 INFANT GROUP

Infants are from 0 to 3 years old, and mother shall take main responsibilities for child rearing during this period. From early companion by parents to later independent games, infants will explore this world by grabbing and climbing. For little babies, they're always cuddled by parents or learn how to make the first step on the lawn. In other words, they do not rely on playground facilities. However, the child who can walk are inclined to play sands or ride a bike within a limited range under the companion of Their parents, in which way, they actually do not use facilities frequently. On this stage, the child will start to feel the space with great curiosity, and tend to accept various information and stimulation from their surroundings. Yet their body motion skills are still developing and cannot exert their natural protective capacity. As they're weak in predicting any danger, we need design lawn, slide, rocking horse and games cabin for them, and the arrangement of facilities shall consider corresponding safety grade based on the proper partition of different games spaces so as to guarantee the safety of the child. Usually, activity areas for infants consist of several closed spaces (enclosed by green hedges or sunk fences) with bright-colored signs, and these areas also have a good ventilation. Equipped with lively cartoon design and structures, facilities are simple and easy for the infant's use with smooth and flat surface to avoid any injury. Meanwhile, relevant rest facilities are well prepared for the convenience of supervision and monitoring.

2. SCHOOL CHILDREN GROUP

Children from 4 to 9 years old can be classed as school children. On this stage, the child's awareness is awakening, and they begin to accept information and feel the surrounding environment in a passive way. In the meantime, their cognitive competence and muscle motion skills are improved with a strong will in making friends, playing games with rules and some group games including hopscotch and chasing.

As younger school children always gather in this area, main game facilities shall be established to improve their motion skill, stimulate their interest in learning and to satisfy their needs for games. Hence, it is necessary to prepare a larger area and specialized instruments for their activities including climbing frame, spiral slide, swing, facilities for water activities etc. In addition, we need also establish some specific areas for the child's group games, obstacle games and water games. Children on this stage are inclined to play games in spacious areas since their motion capacity is largely improved. But boys and girls have different choices in playing games. For example, boys like playing balls, swings, climbing frame and chasing games while girls enjoy rubber band skipping and dancing etc.

On this stage, children are ready for school since their mentality gradually becomes mature to perceive the concept of time in spite of low development level. Capable of logical thinking, children will naturally obtain stronger physical power and pay much attention to intellectual activities. Although most children can walk independently and distinguish different directions, their actions and activities are not stable enough to consciously adjust and control their own movement. Children still need their parents on this stage.

3. THE JUVENILE GROUP

Children from 10 to 14 years old will enter their juvenile period, namely the child's mature period. On this stage / they will gradually develop into the adult in possession of the social man's features with potential rebellion heart. However, they're liable to attend group activities, pay much attention to interpersonal communication and to enjoy the feeling of being cared. On this stage, they are gradually in possession of skills in independent thinking, analysis, judgment and reasoning, and will prefer some adventure games like Adventure Island and Suspension Bridge etc. Actually, a great breakthrough is made in their cognitive abilities, especially Their abstract thinking ability and scientific thinking skills, and their motor skills has nearly reached the adult's. Therefore, we must take the depth of the game content and relevant skill requirements into full consideration in designing level games. Usually, a game needs to have a theme and adventure games must contain several links, As children will gradually be mature on this transitional stage, Their skills in spatial perception are largely improved. In addition to concrete image thinking, their abstract logical thinking also begin to play its part. Moreover, children grow fast during this period with enhanced physical strength. Except for some sports activities, they will gradually turn to various cultural and recreational activities, and some learning-oriented activities will help develop Their brain. Relevant facilities must be made diversified to emphasize the principle of teaching through lively activities, paving the way for their future development.

儿童年龄划分及行为心理分析

关于儿童年龄的划分,联合国《儿童权利公约》中的规定是0-18岁,而医学界主要将0-14岁的儿童作为儿科的研究对象。我们将按照医学界的划分标准,把儿童划分为三个层次,分别是婴幼儿组、学龄儿童组和少年组。不同年龄段的儿童,在生长发育特点、体力、智力与心理、生理等各方面存在差异,这就决定了儿童在户外活动时间,活动内容与对周围环境的要求差异性。

1. 婴幼儿组

0-3岁时期的儿童处于婴幼儿期,早期需要家长陪同,后期转为单独游戏,以抓握、爬行的方式探索世界。较小的婴儿多由家长怀抱或在草坪上上学步,他们对游乐设施的依赖性不强。而幼儿则会在家长的陪伴下玩沙土或骑车等,其活动范围相对有限,在相对有安全感的区域玩耍,对游戏设施的使用量增大。这个时期的孩子处于人生的开端阶段,有了空间知觉的萌芽,有巨大的吸收性心智,逐渐接受周围环境中的各种信息和刺激。该年龄段儿童身体运动技能有限,运动量较小,缺乏自然保护能力,对危险的预知能力低,应多设计草坪、滑梯、摇马、游戏小屋等游戏设施,且设施摆放要充分考虑到安全级别对游戏空间进行场地划分,保障不同年龄儿童的安全。幼儿活动区一般由封闭的空间组成,常常由植物绿篱或矮墙围合而成,具有鲜明的色彩标示。通透性较好游戏设施有幼儿喜爱的卡通造型及构筑物,同时活动场地内配备供监护人方便看护儿童进行游戏活动的休息设施,游戏器械要求简单、光滑且质地较细腻,避免幼儿在 game 活动中受伤。

2. 学龄儿童组

学龄儿童组的年龄大致为4-9岁,这个时期的儿童为意识觉醒期,意识上的懵懂期使得他们被动地吸收信息和接纳环境。该年龄阶段的儿童在认知、身体肌肉运动方面具备一定能力,并且有较强的交友意愿,喜爱规则性游戏,特别是一些跳房子、追逐等集体性游戏。

这个阶段里一般为入学儿童,心智已逐步开发,开始有了时间知觉的萌芽,但发展水平还比较低;具有一定的具象逻辑思维能力,活动的体力强度加大;有一定的自我控制能力,开始有意识地参加集体活动和体育运动,对智力活动的兴趣增强。大部分儿童已可以独立行走,开始能够辨别方位,但行为活动还有很大的不稳定性,不能有意地调节和控制自己的活动,仍需要父母看管。

该阶段的孩子们都比较喜欢在较宽敞的场地上活动,活动量增大,且男女孩子的游戏方式开始有差异。男孩喜欢踢皮球、玩秋千、攀登架等,逗逗打闹,女孩子喜欢跳橡皮筋、跳舞等。所以这个年龄段的儿童区主要以游戏设施为主,以增强学龄儿童的活动能力、培养学习兴趣和满足学龄儿童的游戏需求为目的,因此专门的活动器械和场地显得十分有必要,如攀登架、浪木、螺旋滑梯、秋千、水上活动等,以及可供集体活动的场地、障碍活动区、涉水池等。

3. 少年组

10-14岁的儿童进入了少年期,即儿童的成熟期。他们逐渐转向成年人的过渡期,具备社会人的特征,具有潜在的叛逆心,喜欢群体性的活动,注重人际交往,喜欢成为被关注的焦点。这个时期的少年逐渐具有独立思考、分析、判断推理的能力;具有冒险意识,喜欢尝试稍微有冒险的游戏,例如冒险岛、悬索桥等。该年龄阶段的儿童在认知能力,特别是抽象思维能力和科学思维能力上有很大飞跃,身体运动技能以及运动量上已接近成人。所以在游戏设计上应充分考虑游戏内容所蕴含的思想深度以及游戏在技能上所具有的难度。游戏通常要有一定的主题,并设置多重环节的冒险类游戏。这是儿童由幼稚走向成熟过渡阶段,各个空间知觉发展水平较为完善。心理上除了具体形象思维外,抽象的逻辑思维也开始起作用。这一时期的儿童生长迅速,体力大大加强,除积极参与各项体育活动外,也转向文化、娱乐性活动,并以学习为主导活动来发展脑力思维。

该项目在规划和设计中把生态放首位,以保留场地绿化为原则并设计出标志产品——“树屋”。挑战攀爬、滑梯及钻洞等功能一体的精灵树屋为孩子创造了一个梦幻童话的空间,有利于激发儿童想象创造能力。

The project put ecology in the forefront of planning and design, retaining the principle of greening the site and designing the logo product - the "tree house" derives from it and blends in with it. The challenge of climbing, slides and drilling holes and other functions of one of the elven tree house for children to create a dream fairy tale space, help to stimulate children's imagination to create the ability.

项目设计

结合一系列器械提高孩子跳、爬、钻等能力，从而促进孩子的成长。以活跃的黄、橙、红暖色系结合排压减绪的蓝色，为场地融入对比调和氛围，使孩子更欢快、更健康地玩耍。

该项目的主题是“海洋”。这里可以让孩子们发挥想象，扮演着自己想象的角色，同时也能拓宽孩子之间的互动交流。

在这里孩子们可以掌舵属于自己的海盗船，在蔚蓝的海洋里扬帆起航。孩子们可以在珊瑚上架起秋千随波荡漾，在海底峡谷上滑行攀爬。通过玩耍，儿童不仅释放了能量，发展了活动能力、平衡能力和协调能力，同时也通过社会活动锻炼了社交能力、分析能力以及语言能力。活动区内各个部分都有很好的连接性，游乐设施也适合于所有年龄的儿童。

The project's theme is "Ocean." Here is to allow children to play their imagination, play the role of their own imagination, while broaden the interaction between children's place.

Here children can helm their own pirate ship, set sail in the blue ocean. Children can swing on the coral with waves, climbing in the submarine canyon. Through play, children not only release energy, develop activity ability, balance and coordination ability, but also social ability, analysis ability and language ability through social activities. All parts of the event area are well connected and the rides are also suitable for children of all ages.

整体基础取自群山之形，绵延起伏，错落有致，让空间有节奏的跳动，活跃氛围；以水元素的蓝调地面贯穿着，最大程度地丰富场地层次；为了满足不同阶级儿童需求，设计高、中、低三个难度游戏，调动儿童积极参与性，挑选互动性较高的器械，让儿童从中体验亲情、协调合作等情感，利于培养儿童认知、身体、社交等能力从而让儿童体现游乐空间不仅仅是玩乐，也对保持儿童身心发展起着重要作用。

The overall basis is taken from the shape of the mountains, rolling ups and downs, patchwork, so that the space beat rhythm, active atmosphere; with blue water element runs through the ground, to maximize the rich site level; in order to meet the needs of different classes of children, high design, Medium and low difficulty games to mobilize the children actively participate in the selection of highly interactive devices, so that children experience affection from family ties, coordination and cooperation, which will help children's cognitive, physical, social and other capabilities to allow children to show pleasure Space is not just for fun, it also plays an important role in keeping children's physical and mental development.

辽宁沈阳长白岛中航城儿童活动区

Changbai Island Aviation City children's paradise, Shenyang, Liaoning

该项目在规划和设计中，考虑营造一个趣味的活动空间。场地内重点设计将游乐设施与景观构筑物的融合，整个设计都需游乐设施与土建结合在一起，使整个活动空间更加丰富趣味。丰富孩子们对空间的感知的同时，颜色的搭配上也让孩子们能有欢悦的情绪。场地在考虑到孩童在体能训练上的需求，配置了让孩子可手脚并用以及提升平衡力的器材；同时也考虑到配置一些适合低龄儿童与家长一起互动的设施。

The project in the planning and design, consider creating a fun activity space. The venue focuses on the design of recreational facilities and landscape structures of the integration, the entire design needs recreational facilities and civil engineering together, so that the entire event space is more rich and interesting. Enrich the children's perception of space at the same time, with the color also allows children to have joyful emotions. Taking into account the needs of children in physical training, the venue is equipped with equipment that allows children to use both hands and feet and enhance balance. It also considers the provision of facilities suitable for young children to interact with their parents.

该项目主要从原生态的角度出发，整个场地贴近自然追求原始的美，让孩子们能在玩耍嬉戏的过程中亲近大自然，感受大自然。在设施材质的选取上，大部分使用木制工艺。原始质朴的木色能与周边环境很好的融合，贴合主题思想。场地内各项游乐设施都考虑到孩子们爬、跑、滑、荡、挖、听、钻等方面的需求。场地内在保证各区域划分明确的情况下使路线更为流畅，给予孩子一个更加大的开放性活动空间。

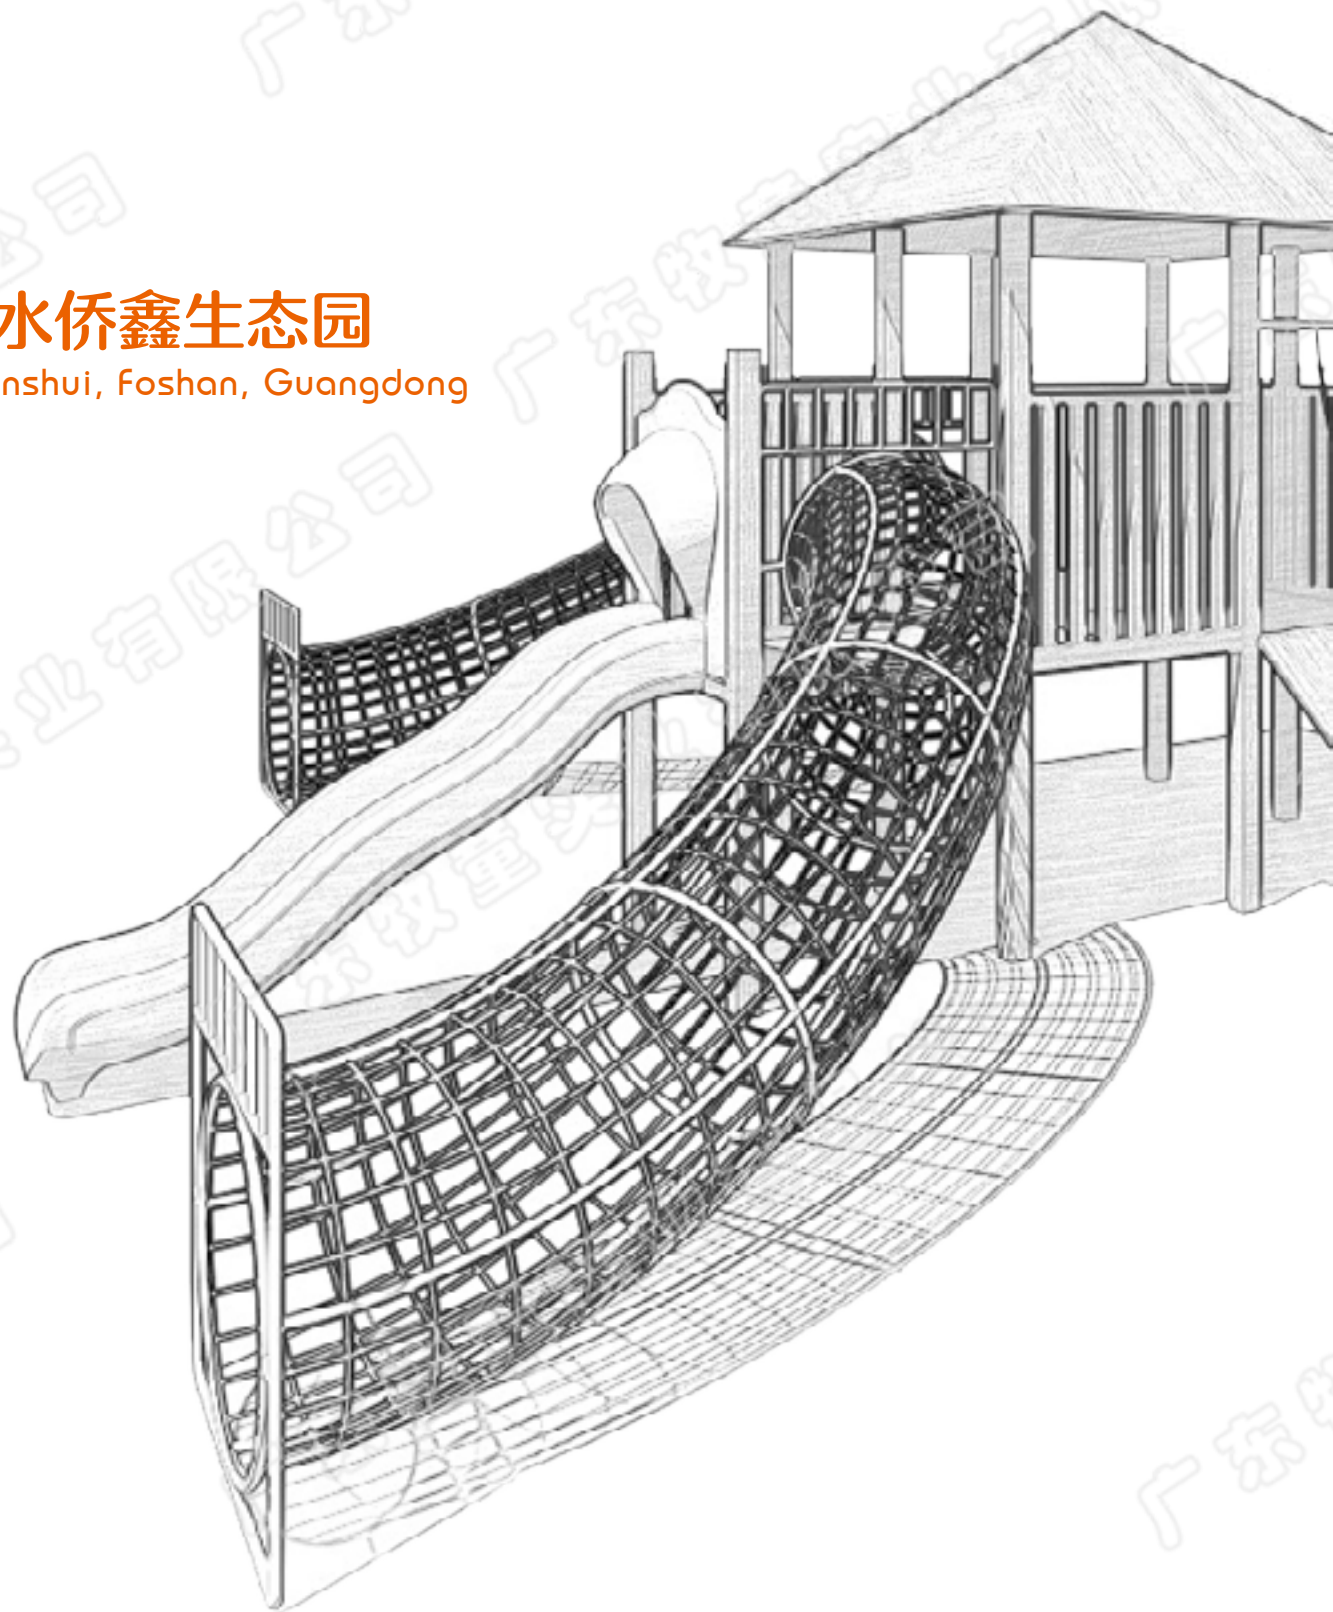

The project mainly from the original ecological point of view, the entire site close to the natural pursuit of the original beauty, so that children can play in the process of close to nature, feel the nature. In the selection of facilities, most of the use of wood technology. The original rustic wood can be a good fusion with the surrounding environment, fit the theme. The playground facilities take into account the needs of children climbing, running, sliding, swinging, digging, listening, drilling and other aspects. Venues within the region to ensure a clear division of circumstances make the route smoother, to give children a more open space for open activities.

该项目是一块房车营地内的户外游乐园,为在外露营的家庭提供一个让孩子嬉戏玩乐的活动区域。项目设计中以贴近自然,融合周边环境为主。孩子在外感受自然的同时也能有与其他孩子互动交流、一起玩耍的空间。

活动空间的分块从年龄段进行区分。项目中太空舱和迷你飞机的布置分别满足了高、低龄对游戏难度的不同需求。太空舱能让大龄儿童在爬玩的过程中感受周边原野的气息,迷你飞机能让低龄儿童在玩耍中进行飞行员的角色扮演。

The project is an outdoor amusement park in a caravan camp, offering a family area for camping activities where children can have fun and play. Project design to close to nature, based on the integration of the surrounding environment. When children feel nature, they also have the space to interact with other children and play together.

The activity space segment is differentiated from the age segment. Space capsule and mini-aircraft layout of the project respectively meet the different needs of high and young age to the difficulty of the game. The space capsule allows older children to experience the atmosphere of the surrounding wilderness as they climb and play, while mini-planes allow young children to play pilot-role-playing roles.

设计师在设计时，充分利用了场地中起伏环绕的地形基础，利用现有的景观资源，结合了儿童身体活动和锻炼需求进行合理布局，打造了一个动静相宜的儿童游乐场所。

项目整体色调为蓝紫色，在调节孩子感受性的同时减少了孩子不好的情绪。大胆地使用了对比色（黄色、橙色），用纯度较高的原色取得夺目的画面效果，形成明快、热烈、灵动的色彩风格。

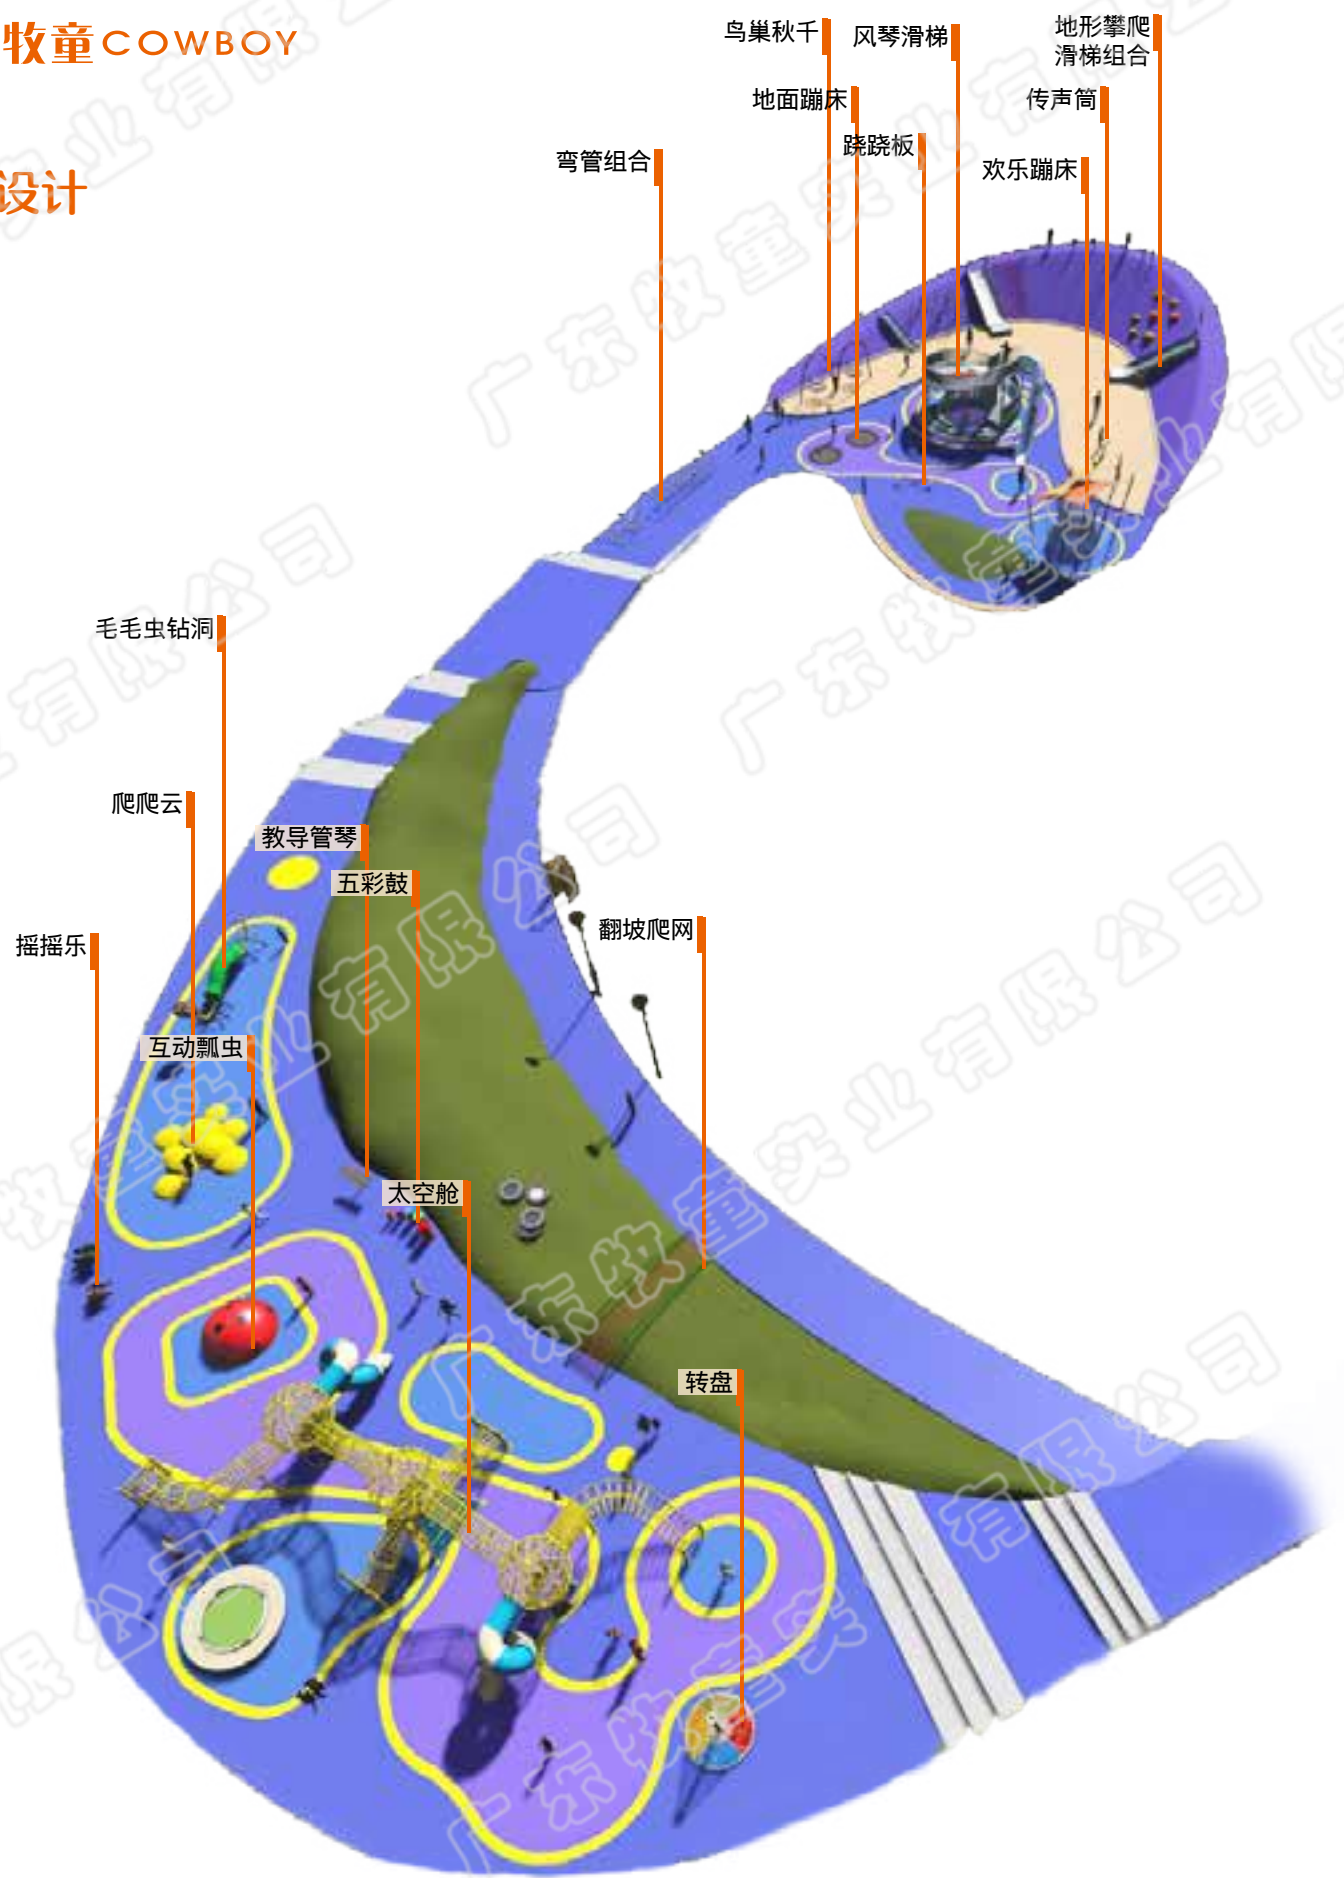

各区域考虑了产品的高低摆放，使空间更具节奏感，能主动吸引孩子前来玩耍。空间上的趣味性唤起儿童快乐的情感，激发儿童主动玩耍的兴趣，从而培养孩子的认知能力。

When designing, designers make full use of the undulating terrain foundation of the site and make use of the existing landscape resources and reasonable layout of children's physical activities and exercise requirements to create an appropriate childrens playground.

The overall color of the project is blue-violet, which reduces the child's bad mood while adjusting the child's sensibility. Bold use of contrasting colors (yellow, orange), with high purity primary colors to obtain eye-catching picture effect, forming a bright, warm, smart color style.

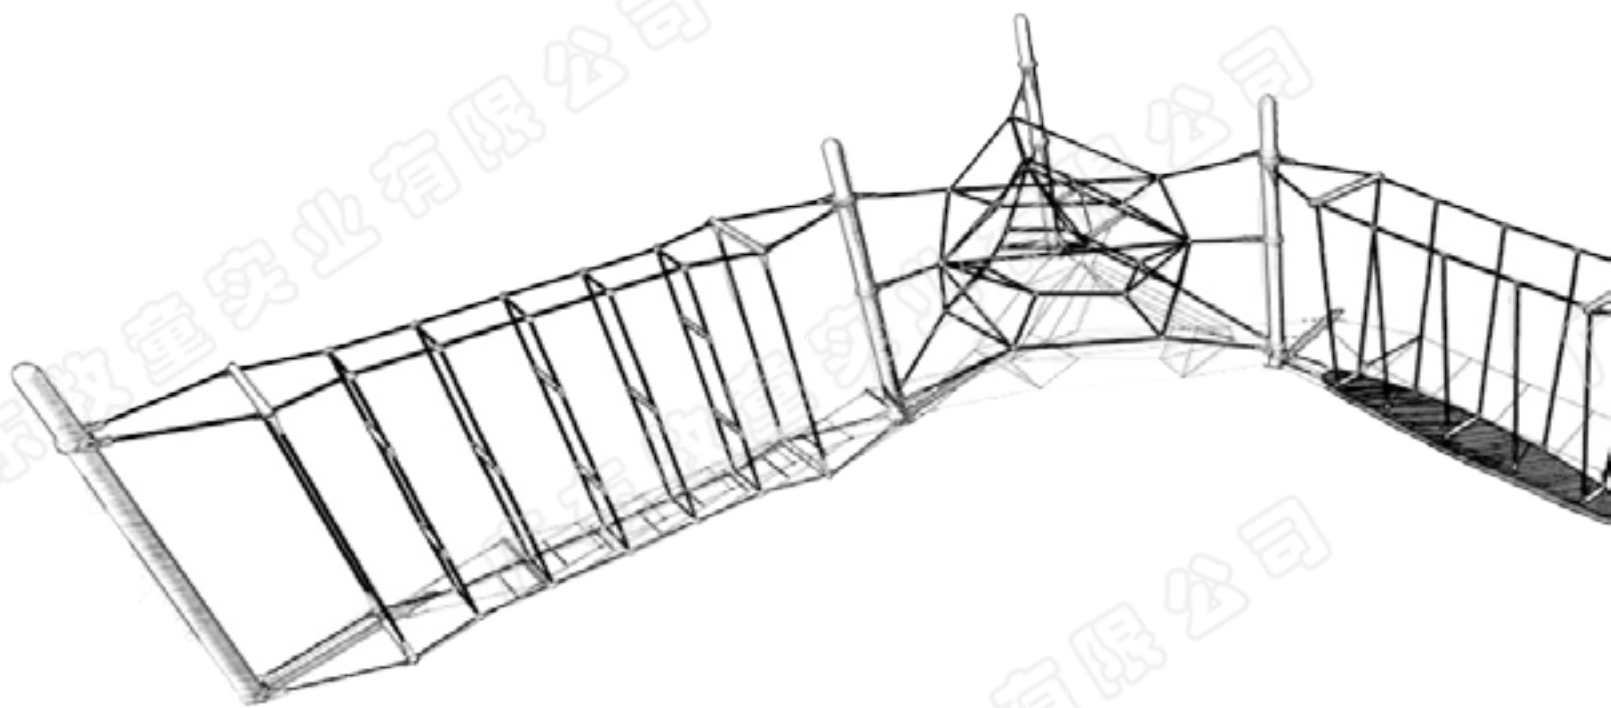

Each area takes into account the height of the product display, make the space more rhythmic, can take the initiative to attract children to play. Spacial arousal arouses the children's happy emotions, stimulate children's interest in active play, and thus develop children's cognitive abilities.

攀爬拓展系列

A succession of Treetops Adventure

攀爬、攀岩、绳网等体能训练是冒险教育中必不可少的一部分，可以增强体质、促进智力发展。它以运动、探索、挑战、成长为核心，融入了风靡国际的户外运动、拓展培训、童军教育、心理行为训练的精华，是促进儿童体能、智能、情商全面发展的综合训练设施。

小朋友在攀爬时，让他们有犹如在攀爬一座山或一块大石头的感觉，安全而冒险的挑战活动使他们在攀爬中学会克服困难，培养顽强的意志力及自我保护意识，同时使自身体能有所提升。而我们要做到的是，在设计中排除一切不安全因素。

Physical training such as climbing, rock climbing, rope nets and other physical training is an essential part of risk education, which can enhance physical fitness and promote intellectual development. It focuses on sports, exploration, challenge and growth. It integrates the most popular international outdoor sports, scouting training, scout education and psycho-behavioral training. It is an integrated training facility that promotes the comprehensive development of children's physical fitness, intelligence and emotional intelligence.

When they climb, children feel as if they are climbing a mountain or a big rock. The safe and adventurous challenge activity enables them to overcome difficulties, cultivate tenacious willpower and self-protection awareness while climbing. Self-physical enhancements. And what we have to do is to exclude all the unsafe factors in the design.

不锈钢系列

Stainless steel series

不锈钢滑梯是一种比较新颖的游乐设备。目前市场上的滑梯基本都是塑料材质，滚塑成型，模具化生产，但是规模化的生产造成了滑梯尺寸、形状固定，满足不了不规则场地的安装。不锈钢游乐设施跳出了这个局限，不锈钢定制滑梯能够因地制宜，适应各种场地的安装、调试。不锈钢材质的好处就在于不但外形精美，而且长度可以控制，可以是螺旋S滑梯、直滑梯、弧形梯、筒滑、半筒滑梯、交叉麻花状盘旋等。也可以根据公园、游乐场、学校、购物中心、办公大楼、度假酒店等地形定制坡道滑梯，在追求差异化的今天，满足了设计师的设计灵感，各种奇异构思都能通过不锈钢滑梯的造型得到呈现。

材质：不锈钢滑梯面分为镜面不锈钢和拉丝不锈钢，镜面不锈钢的亮度更好，拉丝处理后的不锈钢面则更显高贵厚重感。

功能：不锈钢滑梯广泛应用公园、游乐场、学校、购物中心、办公大楼、度假酒店等游乐区域，其独特的造型和过硬的品质受到国内外园林景观机构的一致好评。
