Cowboy Group (Guangdong) Industrial Co., Ltd. was founded in 2003. It is a service provider of overall solutions for children's theme parks integrating R&D, design, customization, production, installation and service, and a leader in China's unpowered amusement industry. Now it has four major factory production bases, four major exhibition halls, four major marketing centers, two major R&D and design centers, and has established a number of direct subsidiaries in Beijing, Shanghai, Hunan, Hubei, Guangxi, Jiangxi, Yunnan, Sichuan, Henan and other places. Whether it is cultural tourism scenic spots, real estate communities or municipal parks, our projects are spread all over the country and more than 120 countries and regions overseas, which are deeply trusted and praised by customers. Cowboy Group has always adhered to the corporate philosophy of "rooted in quality, based on honesty, live in credibility", focusing on the control of product quality. Our products have passed ISO9001 quality management system certification, ISO14001 environmental management system certification, OHSAS18001 occupational health and safety management system certification, EU CE certification, German national GS standard certification, China National Compulsory Product Certification (CCC) and many other well-known certifications at home and abroad. Our company is an important member of China Toys and Baby Products Association, China Amusement Park Association and other industry organizations. Cowboy Group has never just made products, but also created value for customers to achieve win-win! Enlighten people with talents and build the future!

Our company monitors its products quality with a strict quality management system and takes the lead in passing the domestic counterparts.

- ISO9001 Quality Management System Certification
- ISO14001 Environmental Management System Certification
- OHSAS18001 Occupational Health and Safety Management System Certification
- EU CE certification
- German National GS Standard Certification
- China National Compulsory Product Certification (ccc)

## Company Qualifications

Our products have successively passed ISO9001 quality management system certification, ISO14001 environmental management system certification, OHSAS18001 occupational health and safety management system certification, EU CE certification, German national GS standard certification, China National Compulsory Product Certification (CCC) and many other domestic and foreign authority certifications. Shown here are part of the product quality inspection, insurance and honors obtained, which is our Cowboy's quality assurance system. Please feel at ease, comfortable, and rest assured to choose our products.

## PARTNERS

Last year, under the severe epidemic environment, Our Cowboy Group established good partnerships with many platforms to achieve mutual benefit and win-win, create the future together, thus achieving growth against the trend.

## Our Customers

## Design Principles

## Safety First Principle

1

Children are a vulnerable group that is easy to injury in game activities. Safety issues must be put first in the design of children's playground reconstruction. The site selection of children's game venues should avoid the interference of roadways, stay away from cluttered, complex and mobile public venues, and at the same time have close contact with surrounding venues to avoid visual blind spots and reduce vehicles. At the same time, pay attention to the detail design and the safety of game equipment during the site reconstruction, strengthen management and maintenance, and avoid accidental injuries to children caused by nails and bolts.

## Child-Oriented Principle

2

The planning and design of children's playground must not only meet the needs of children's play, but also be determined according to the characteristics of children's physical condition, psychological characteristics and park environmental conditions. The arrangement of activity space and game facilities should serve the purpose of children, fully respect children's individuality and autonomy, develop children's creativity in activities, and handle the relationship between private space and public space, dynamic space and static space to create a good place for children's activities. In the transformation design, attention should be paid to children's physical activities, such as climbing, walking, running, etc., in order to set up appropriate amusement facilities.

## The Principle of Adapting to Local Conditions

3

Children's playgrounds are not necessarily completely flat. We will make full use of the existing terrain, plants and infrastructure of the children's playground to improve it. If conditions permit, terrain and other structures can be used to create novel children's play spaces. In addition to traditional amusement facilities such as swings, seesaws, and slides, it is also possible to use old tires and rollers as equipment for children's games based on the use of terrain, which not only reduces the cost of the playground, but can also give full play to Children's creativity and imagination.

## Principle of Integrating Man and Nature

4

Fully explore the relationship between man and nature, allowing children to communicate with nature while communicating with their parents and others, to feel the air, land, plants, etc., and to blend in with nature. Let children experience themselves in the sense and understanding of the outside world, growing in the perception of nature.

## Cowboy Cases

### EXCELLENT ITEMS

Project Area: 3,000 square meters  
Landing Time: 2020-08

Theme amusement design of children's activity area in Taohuajiang Tourism Resort in Yiyang, Hunan

# Fairy Tale World

## Fantasy Rich Peculiar

Fairy tales are the channel connecting reality and dreams. In the world of fairy tales, we can imagine freely and bring dreams closer to reality.

When little Amy was bored, she found a talking white rabbit with a pocket watch. She chased it and accidentally fell into a rabbit hole, and thus fell into the magical underground world.

In this world, he has been to many places: there are magical castles, sharks in the deep sea, fossils buried in the sand, clouds that can jump, and swings that can shine. She also met a lot of people and animals: Prince William and Princess Ruth. In this crazy world, only Little Amy is awake, constantly growing in the constant adventures, and suddenly waking up when he grows into a big boy, turning out that is a dream.

Shanghai Shimao SinkHole Secret Elven City Theme Park

## Elf Kingdom

*A fantastic adventure in the fairy tale world*

In accordance with the needs of children of different ages, the park has designed the fairy tree house, bug world, adventure kingdom, joy swing, secret garden, desert archeology, dream waters and other parent-child play areas. Among them, the unpowered amusement facilities built by the Cowboy integrate safety, interactivity and aesthetics, creating a "new landmark for online celebrity check-in" for tourists.

Elven City Theme Park is a comprehensive theme park located in Sheshan, Shanghai, which is adjacent to the world's first Shimao SinkHole Hotel with a negative altitude of nearly 100 meters and combines the world's architectural miracle and international IP to bring a brand new vacation experience to tourists.

Elven City Theme Park

Project Location: Shanghai Sheshan

Landing Time: 2019-04

## China Begonia Garden

Project Location: Yancheng, Jiangsu

Project Area: 8,000 square meters

Landing Time: 2020-05

Themed Amusement Design for Children's Activity Area of China Begonia Garden in Yancheng, Jiangsu

# Begonia Treasure

## Fantasy Sea Treasure Hunt

China Begonia Garden is located in Yannan High-tech Zone, Yancheng City, Jiangsu Province. It is one of the country's largest Begonia theme parks with the most comprehensive variety, the most beautiful landscape, the longest viewing period, and the richest cultural connotations.

In the Begonia Paradise, there are different themed areas such as the Sea Spirit Kingdom, Begonia Treasure Garden, Happy Fish Bay, and Magic Bay.

In the park, a variety of amusement equipment integrating dreams, imagination, creativity and adventure are arranged in different areas, so that children can enjoy different amusement experiences in fun and inspiration.

# Yintan Children's Amusement Park

Project Location: Luohe, Henan  
Project Area: 40,000 square meters  
Landing Time: 2020-07

## Theme Amusement Design of Yintan Children's Park in Luohe, Henan

The children's park is divided into five play areas: extreme island, crab snail bay, octopus road, happy beach, fun trail, each area has its own characteristics. Extreme Island, Crab Bay and Octopus Road are the three core regions. In the extreme island, there are pirate ships, wave competitions, irregular climbing nets, etc., including balanced swing bridge, hanging pile, slide cable, small runway, etc. The Bay of Crab Snails uses a huge spiral viewing platform to simulate a tornado as the center, creating a fantastic scene of whirlpools absorbing crabs and snails. At the same time, crabs and conches are full of recreational facilities such as drilling, climbing and sliding, so that children can play freely on crabs and feel the wonder of living inside the conch. The Octopus Road adopts the annular design to form a sunken and diversified amusement space, in which there is a big-eyed octopus waving its tentacles, beckoning the children to enter the paradise and enjoy themselves. Luohe Children's Park is a children's theme park, which can survey the waterscape and enjoy the strange ocean. It aims to provide a good place for daily leisure and parent-child travel in the city center for Luohe citizens.

Qishan Zhou Culture Children's Park

Project Location: Baoji, Shaanxi

Project Area: 4,000 square meters

Landing Time: 2017-06

### Theme Amusement Design of Qishan Week Culture Children's Park in Baoji, Shaanxi

The design is inspired by the big banyan tree in the primitive jungle, and incorporates amusement facilities into the jungle scene; it aims to allow children to leave the virtual network world and communicate in the outdoor nature.

The latest amusement equipment is rigorously scientifically designed and assembled, and is composed of multiple linear metal platforms, each of which is connected by various metal support rods or ropes. The combination of non-synchronized channels between the platforms makes climbing, leaping and walking in the air more diversified, full of fun and infinite entertainment.

Under the tree is a small world of insects. Life scenes are created by mimicking rocks and mountain peaks, and various insects live next to it. Combining different types of games to create a natural ecological world, suitable for different age groups, so that all children can find their own game place. From the big tree to the insect world, you can find the taste of nature here, and find the green field for spiritual rest.

Theme Amusement Design for Children's Activity Area in Lehu Park, Suzhou City, Anhui Province

## Future Unlimited

### Fantasy Adventure

The project is located in Lehu Park, Gangli East City, Suzhou City, Anhui Province. The amusement park covers an area of 3800 square meters. The overall design of the park can play 760 people. It is an outdoor unpowered park suitable for parent-child interaction, leisure and entertainment, and children of all ages.

Build the first cultural park with the theme of "Happy Stone", the first comprehensive urban park, and the first Yongqiao Ecological Science Education Park. After completion, it will become a landmark project in Dongcheng District, which will be of great significance to the transformation of shanty towns, the improvement of residents' living environment and the enhancement of the city's image.

Lehu Park Children's Activity Area

Project Location: Suzhou, Anhui

Project Area: 3,800 square meters

Landing Time: 2020-09

The design of the amusement park was inspired by Zhuangzi's "A Happy Excursion" "In the northern ocean there is a fish, called the Kun, I do not know how many thousand li in size." the concept of "there are fish in Lehu" is extracted; Combining the characteristics of fish spitting bubbles to create a dreamy bubble park for children. The park has set up a bubble theme facility activity area, a bubble trampoline area, a bubble maze area, a bubble sandpit activity area, and a bubble swing park and other functional areas, so that children can enjoy different play experience.

01 Crazy Ape Man Parent-child Playground in Sanggan River Canyon Scenic Area, Zhangjiakou, Hebei

## Tribal Adventure

### Wild Ecology

Located in the Sanggan River Scenic Spot of Zhangjiakou, the Crazy Ape Man Park creates the life scenes of apes in the primitive society through scene-style construction. It combines the young age park and theme packaging to restore the life scenes, and creates an immersive theme park integrating scene experience and outdoor amusement for children.

The park can be divided into three themed areas: ape-man cave, ostrich egg hunting, and horse hunting field. Each area has been carefully arranged. Through a scene-like layout, combined with paleontological elements, created a combined primitive social ape life scene.

The Crazy Ape Shiren Paradise designed by Cowboy Group is built on the hillside, using turf and sand as the ground paving materials to fully restore the ecology of the primitive society, so that children can experience the uniqueness and thrills of primitive life!

Guangzhou Yuexiu Yuehui City Fortune Plaza Theme Amusement Design

## Butterfly Metamorphosis

### Brilliant Joy

The concept comes from "Butterfly breaking through cocoon". The site is located at the front end of the main building. The overall building is like a dancing butterfly. The design uses caterpillar elements to form a linkage relationship with the overall building, showing the process of a small insect growing into a butterfly.

The main body of the venue adopts net rope and perforated board, which is more transparent. The light in different periods of time in the natural world produces different light and shadow effects through the main body, thus giving children a different game experience.

## Xinhui North Garden Park

Project Location: Jiangmen, Guangdong

Project Area: 4,000 square meters

Landing Time: 2020-07

### Theme Amusement Design of North Garden Park of Xinhui, Jiangmen, Guangdong

## Adventure Exploration

By extracting local characteristic elements to create a paradise, the river transport is associated with the ancient ship sailing; the carrier water of the ship is associated with the flow, sluice, waterwheel, etc., thus creating an Archimedes water park.

The site used to be a kiln site, which extracted the shape of a brick kiln and designed a custom hide-and-seek paradise for the site. At the same time, weather elements are also integrated into children's fun, so that children can also learn knowledge when playing; So as to create a children's playground full of mystery and educational significance, to bring children a fun, adventurous journey of exploration.

## Mianyang Fonte Oriental God Painting

Project Location: Mianyang, Sichuan

Project Area: 3,000 square meters

Landing Time: 2020-06

### Mianyang Fonte Oriental God Painting

#### Oriental God Painting

Located in Mianjiang Avenue, Jiangyou City, Mianyang, Sichuan Province, Mianyang Fonte Oriental Painting is a large-scale cultural high-tech theme park carefully built by Huaqiang Fonte Group. With the theme of Chinese historical and cultural heritage, the park integrates myths and legends, historical allusions, and folk customs through new content creativity, technological innovation and subtle layout, allowing visitors to experience the infinite charm of the collision of technology and culture.

In Mianyang Fonte Oriental Painting, people can not only feel the profound Chinese history, but also experience the splendid modern technology. The diversified and personalized theme amusement experience of the park will meet the entertainment needs of tourists of different ages, allowing the family to share a joyful experience in experiencing high-quality cultural tourism products and services.

## Gongbu Children's Amusement Park

This project is the design of a children's play area in a park, designed to meet the needs of children of different ages. The children's play area is divided into three parts. The first part is mainly a comprehensive playground, suitable for children of all ages to play, combined with ground patterns, swings, jumping music and other functions to create a comprehensive playground; the second part is mainly rock climbing, suitable for children over 6 years old combine the shape of the iceberg to create iceberg climbing; the third part focuses on leisure interaction, providing play space for parents and children. The whole park is paved with colorful soft mats so that children can play safely.

### Dinosaur Themed Playground

Project Location: Japan  
 Project Area: 5,000 square meters  
 Landing Time: 2020-10

Theme parks and theme playgrounds in the leisure industry are spaces for people to play, relax and enjoy. The design and development of theme parks should be subject to theme planning in advance to set up the park's venues, facilities, activities, performances, landscapes, auxiliary facilities, commodities, etc., so as to form a unique theme park.

### Danyang County Scenic Slide

Project Location: Korea  
 Project Area: /  
 Landing Time: 2020-02

Project start date: July 2018  
 Installation completion date: February 11, 2020 (completed as planned)  
 Design innovation: the world's highest drop slide, reaching 108 meters; this project has passed customer acceptance.

The longest in Asia-Korean stainless steel slide.  
 The stainless steel slide project in Danyang County, South Korea is one of the eight scenic spots of the Korea Tourism Administration. Our CowBoy Group provides customers with one-stop service from design to installation.

## Full House Candy World Breakthrough

Project Location: Dongguan, Guangdong

Project Area: 2,000 square meters

Landing Time: 2017-06

Themed Amusement Design of Full House Candy World Breakthrough in Dongguan, Guangdong

# Candy World

With candy as the theme, this case aims to create a romantic world of breakthroughs. Using brilliant colors, undulating terrain, combined with architecture to create a romantic candy world, and combined with different game facilities to create a multi-functional world of barriers, in the barrier design, taking into account the physical development of children, climbing, sliding, drilling and feeling, Intelligence games are combined to form a continuous challenge level. Let the children develop physically and mentally and thrive in play. The design follows child-oriented, safety first, creating a rich and diverse space for children in a limited space.

The elephant legend

Themed Amusement Design of Jianfa Central Seal Children's Playground in Nanning, Guangxi

## Wuxiang Playground

### The Legendary Guardian Giant Elephant

Long long ago there was a legend, five god elephants in the sky happened to pass through Nanning and found that this magical and beautiful land was not only fertile and watery, but also the people were loyal, kind, honest, diligent, and hospitable. So they went down here to help the villagers plow the land, harvest grain and chop rice, then established a sincere relationship with the villagers. Later the Yongjiang River flooded the land and the land was inundated. The masses had no means to live. Nanning also lost its original beauty and richness. So the five god elephants turned into five mountains, blocking the flood. Since then, they has been the permanent protector of this land.

—"Nanning Five Elephant Legend"

Jianfa Central Seal Children's Playground

Project Location: Nanning, Guangxi

Project Area : 1,200 square meters

Landing Time: 2020-06

Combine nature, art and science to create a natural paradise for children as much as possible in the reinforced concrete city.

Design, make our life better, make children's childhood better.

In order to conform to the community design concept of Jianfa Central Seal Chinese Garden, the playground created by Cowboy Group selected the local traditional five elephants legend of Nanning as the basis, creating a scene that implies "the Swiss elephant drinks the river and protects the soil and water".

# Jingo Jimei Children's Playground

Project Location: Shenyang, Liaoning

Project Area: 1,000 square meters

Landing Time: 2020-07

## Themed Amusement Design of Jingo Jimei Children's Playground in Shenyang, Liaoning

Snow flies, lightly touch the ground, forming a silver-clad city, and the world covered in snow is silent. Innocent children broke into the city, running wantonly, discovering the colorful world covered in snow.

In this small space, we not only hope to realize the children's dreams, but also to interpret the space and details in a modern way, allowing people to walk in the gorgeous colors of fairy tales, just like everyone's original ideal home.

The fresh and warm colors and interesting and bold shapes better cater to children's various imaginations of the world. At the same time, interactive content is set according to the age group, which not only ensures the safety of children, but also provides children with more possibilities for exploration.

# Sunshine 100 Arles Children's Activity Area

Project Location: Qingyuan, Guangdong

Project Area: 3,500 square meters

Landing Time: 2019-05

## Themed Amusement Design of Sunshine 100 Arles Children's Activity Area in Qingyuan, Guangdong

The huge pirate ship set sail and brought the children to the fantasy world. There are countless weird things, huge tops, spider webs, and magic moonlight swings. Let us explore the mysteries here.

The design of the children's activity area is based on the theme of "children's dreams and enjoyment", from the island of clouds to the ocean of stars, and finally into the colorful dream, creating a dreamland that children love. At the same time, through the study of activities and venue requirements for children of different ages, a reasonable layout of children's amusement facilities allows them to wander in the dream world. Inspired by clouds, stars and rainbows, the amusement facilities are designed in combination with climbing, expansion, and leisure to enrich the exploration process and enhance the theme of the venue.

The whale world

Theme Amusement Design of Xiuying Port Paulie Central Coast Whale Park in Haikou, Hainan

# Whale Park

Exclusive customized IP image pilot whale

Children are our future. Although the process of creating a pleasant, challenging and healthy environment is tedious and time-consuming, the investment is worthwhile. Moreover, it has also benefited us a lot. Let us plan, create, and enjoy entertainment and leisure time with our children.

Paulie Central Coast Whale Park

Project Location: Haikou, Hainan

Project Area: 1,200 square meters

Landing Time: 2020-06

### Background Story

There are a group of happy little whales living in the whale park. The migratory period is about to come. In order to ensure the safety of migration, the group of whales began to select pilot whales. Little Navl is also one of the contestants. To become a pilot whale, you must pass three challenges, stun storm, lost fish, pilot whale. Kids, let us help little Navl become a little pilot whale!

Themed Amusement Design of Teresa Teng's Garden in Handan, Hebei

## Nostalgic Childlike Music Joy

Inspired by Teresa Teng's love songs, we use pure white as the keynote, and use modern, concise, and smooth lines to create a vibrant, fun, and fairy-tale children's playground. The use of interactive devices makes the park more vivid, with the attribute of "net celebrity".

Outdoor development training can exercise children's psychological quality, allow children to establish a positive and good attitude, strengthen understanding and communication, cultivate good collectivism, form an excellent teamwork spirit, hone children's will, and strengthen discipline.

This project design uses three design elements of "point, line and surface" to spread out the environmental space, realize the outdoor expansion and interaction between parents and children, and promote parent-child relationship.

## Sculpture Theme Series

The main factors of Shepherd Boy's design concept are safety, shape, and sense of space. In the design process, "jungle" is the main design element, and all facilities are based on safety first, aiming at cultivating and exercising children's physique and adventurous spirit, paying special attention to other details such as scale, color, paving, plants, etc.

How to let visitors experience the theme atmosphere and amusement projects with more immersive experience is the key to theme packaging. In the "immersive entertainment" component of the theme park, the packaging carries the main role of the theme atmosphere and worldview construction. The main purpose of the packaging is to restore the truth. The truth is not only to restore the objects in reality, but to restore the appearance in the theme story description, restore a real theme world.

## THE STAINLESS STEEL SLIDE

### Advantages of stainless steel slide products:

#### 1. Compared to traditional plastic slides

1. The stainless steel slide has better stability and durability.
2. The stainless steel slide can be adapted to the installation and debugging of various sites.
3. The stainless steel slide has rich shapes, which can be combined with acrylic or LED as decoration to increase the fun and challenge.
4. The audience of stainless steel slides is very wide, suitable for all ages.
5. Rich in shape and more ornamental.

#### 2. The safety of stainless steel slide products

1. Design modeling and documents must meet national requirements and standards.
2. The material is environmentally friendly and non-toxic.
3. The slide must not have sharp corners, and under any circumstances should adopt the form of excessive rounded corners.
4. Set up guardrail.
5. EPDM mats are used on the ground to cushion.

Landscape

Amusement

Transport

Fire exit

### Disassembly of stainless steel slide structure:

1. Slide body: entrance part, curved section, straight section, exit part combination, lighting parts
2. Supporting frame: column, bracket (see the figure below for details)

#### Stainless Steel Slide

1. The cylinder diameter is 760mm, the outer diameter is 800mm (including edging), the material is 304 stainless steel, the thickness is 4mm, and the double-sided drawing is processed; the half-barrel protective tube diameter is 38mm, the material is 304 stainless steel, and the thickness is 2.5mm.
2. The total length of a fully enclosed stainless steel slide bucket at the entrance and exit of the slide shall not be less than 1000mm.

#### Acrylic Board

The diameter is 760mm, the material is acrylic transparent board, the thickness is not less than 3mm, and it is fixed on the upper half of the slide by a stainless steel frame.

#### Surface Spray

1. Use non-toxic, environmentally friendly, strong adhesion, wear-resistant, non-fading outdoor metal paint or outdoor special plastic powder; the surface of the sprayed layer is smooth and even, with uniform thickness, and the thickness of the paint layer is not less than 0.1mm;
2. Used for the outer surface of the stainless steel slide and the outer surface of the stainless steel column structure of the slide.

### Maintenance instructions for stainless steel slides:

#### 1. Daily Visual Inspection

Daily visual inspection of the slide and its components, and identification of damage caused by vandalism, overuse or weather. For slides that have been overused or vandalized, daily inspections are necessary. The main points of visual and operational inspections are cleanliness, facility ground clearance, ground surface polishing, exposed foundations, sharp edges, missing parts, excessive wear (moving parts), and structural integrity.

#### 2. Operation Check

The operation inspection is to check the operation and stability of the slide more carefully, especially the wear. Check every 1-3 months according to the manufacturer's instructions. Pay special attention to parts that are sealed to extend life.

#### 3. Main Annual Inspection

The annual main inspection interval should not exceed 12 months. Check the overall safety of the main components, foundations and surfaces, such as the impact of weather, signs of corrosion and the safety of the slide after repair or addition or replacement of components. The annual main inspection can disassemble some parts for inspection, which is carried out by professionals in strict accordance with the instructions. The required business level varies with different tasks.

#### 4. Daily Maintenance

Use all-purpose cleaner, glass water or detergent with a wet towel to wipe off water marks, dust, and oil on the stainless steel.

### Instructions for using stainless steel slides:

1. When playing, please follow the instructions of the staff when using the amusement facilities, pay attention to safety, and conduct activities in an orderly manner.
2. This stainless steel slide facility is limited to people above 1.2m in height, and the weight must not exceed 80 kg.
3. Please leave your personal belongings to your companion for safekeeping during use, such as mobile phones, glasses, bags, high heels and other sharp objects.
4. During the experience, you need to wrap your legs with a cloth bag, cross your hands on your chest, raise your head slightly, and straighten your legs together. During use, please keep your limbs sliding down, do not make other movements, otherwise you will be responsible for the consequences.
5. Patients with heart disease and epilepsy are prohibited from using this amusement equipment, and patients with other pathologies should not use it.
6. Your health and safety are our greatest wishes. Please follow the above tips when using amusement facilities to avoid losses due to improper use. Please follow the staff's guidance when using amusement facilities.

# 2021 CRYSTAL TOWER

## CRYSTAL TOWER

If you want to experience a variety of high-altitude adventure equipment at once, the crystal tower can perfectly meet your needs. The Crystal Tower is currently the most novel and largest high-altitude adventure facility in China. It is a complex that integrates extended courses and amusement attributes. The equipment is made of steel as a whole, and there are adventure levels with different difficulty levels to meet the needs of all ages. From the perspective of physical exercise, it has good operability and interest. From the perspective of research, the crystal tower can meet the educational demands of elementary and middle school students for group challenges and collaboration, and is an innovation of traditional outreach training facilities. The wooden platform at the top is also a very good platform for rest and activities, even if you are not involved in climbing, you can also go on the platform to take a rest. The platform on the top of the tower can be used for companies or groups to organize party activities, bringing a new experience to tourists.

The Adventure Castle is exciting, come and join the Prince and Princess Adventure! With its lightweight and sturdy fiberglass materials and dreamy Disney architecture, the castle keeps children enjoy themselves so much as to forget to leave. The change in the difficulty of the game stimulated the children's spirit of challenge. Climbing an inclined ladder exercises the cross-coordination ability and promotes the intellectual development at the same time. Climbing up the wall can protect the castle from the dragon's attack. The pea slide can exercise children's physical fitness and promote tactile development. On one side of the castle, the musical beats add a lot of fun and train the children to think logically, creatively and rhythmically. Under the castle there are theatrical stages and other social games, such as the Treasure House and Alice's Adventures in Wonderland."

MT0108-The Adventure Castle

MT0109-Rainbow Extension(The Theme Edition)

MT0115-Candy Swing(The Theme Edition)

MT014-Musical Games(Swan)

MT0111-Brush Seesaw
